Description

Set of 4 Candlesticks, Chiseled Brass Candle Holders - Neoclassical.

A refined set of four patinated brass altar candlesticks, dating back to the late 18th century. Featuring elegant chiseled workmanship with leaf and floral motifs, typical of the Neoclassical style, these candlesticks feature a solid tripod base with curved feet and relief decorations. The tapered, fluted stems rise upward, culminating in an ornate cup with a central tip for holding candles.

The original patina and light oxidation lend further charm and authenticity to the piece. Ideal for enhancing classical settings, churches, or collections of sacred art.
