

## Art Nouveau Chandelier In Patinated Bronze In The Shape Of A Thistle And Cut Crystal Globe

400 EUR

Period : 19th century

Condition : Très bon état

Material : Bronze

### Description

Sublime Art Nouveau chandelier in patinated bronze, finely crafted in the shape of an oak branch adorned with stylized leaves and acorns, poetically evoking the luxuriant nature dear to the movement. The sinuous and organic shaft is topped with finely ribbed leaves and bronze scrolls, typical of the vegetal elegance of this period. The frosted glass globe, wheel-cut, takes the shape of a thistle or stylized acorn. It is richly engraved with geometric cross-patterns and pointed foliage, creating beautiful plays of light once illuminated. A rare and decorative light fixture, both sculptural and poetic, ideal for enhancing a characterful interior, an entrance, a living room or a library.
