

Baroque Metronome By Brade, Patented Circa1900, Good Working Order

240 EUR

Signature : Brade

Period : 20th century

Condition : Bon état

Material : Metal

Width : 10,6cm

Height : 18,5cm

Description

I am using here the text of auctions for this type of object: Metronome by BRADE made circa 1910. Created by George Frédéric BRADE 1900, patent extension 1904. Pyramidal shape from cast metal. On the right side a lever allows opening of doors on front revealing the pendulum and its cursor. Key winder. Width: 106 mm
Height: 185 mm weight: 0.9 kg. Condition: good, both for the baroque body from cast white metal, and for mechanism, which still feels young and clicks the cadences correctly. The paper dial has however yellowed, and has undergone a glueing, not very visible. This object is for immediate purchase, payable by credit card or paypal.
