Description

Beautiful art nouveau 2-light table lamp with pink opalescent tulips in the shape of clematis. Typical of the period, charming lamp with two hot-worked tulips in the shape of clematis. Fine opalescence with a pink edge, all the charm of an era. The base is very stable with acanthus leaves on the stems and a star-shaped base of plants. Very floral, both the base and the foot. 34 cm high, good condition, works well, the old wire is worn, to be changed on request but this does not hinder in any way. To place on a pretty desk or on a bedside table, very charming.
