Description

Vintage Metal Airplane Model on Wooden Base 1950s-1960s Elegant metal jet airplane model, likely made between the 1950s and 1960s, mounted on a wood and metal base. The plane features a design typical of post-World War I airliners, with stylized details and a dynamic upward tilt that conveys a sense of movement. The metal stand elegantly curves upward, fixed to a rectangular wooden base. The rhomboid base features a metal insert and two fluted vertical elements, perhaps a photo holder...today it can be used as a business card holder. The plane's paint is visibly worn, giving the object a charming, authentic, worn look, ideal for collectors or as a decorative object in vintage or industrial settings. Dimensions: 24 x 20 cm (plane) - total height 25.5 cm
