Depth : 15,1 centimètres

Description

A large planter... In polished chiseled hammered copper... And polished cast brass mount... And the bottom in zinc... From the 1910s... It is in the transitional period... From art nouveau to art deco... Called the SESSION... The style is with a remainder of art nouveau and with already the beginnings of art deco... These are rare objects...! It is in good condition, the few wears of use... Some holes made or origins on the bottom... I cleaned it rather outside... With a stamp below... An ostrich or other in a diamond... With a capital "M"... For me it is AUSTRIAN... A beautiful object which is rare marked its time well...! Weight ... 2 kilos 79 gr
