Description

Pair of Empire Candelabra in Gilded Bronze 1800 in good condition despite the slightest browning on the laminate stem (this surface is subject to the grip and therefore to greater wear) and on the base. The gilding is enhanced by the contrast between the opaque parts in the background and those polished with agate stone on the reliefs of the decoration in order to give greater depth. The candlesticks have not been electrified in the past and are therefore without the consequent holes. They are of Italian manufacture and date back to the first half of the 1800s.
