Description

- 267 x 370 mm in view and 310 x 410 with its frame which is of no interest and very damaged, the reason we kept it is that on the back we see that this painting has been in this frame for a long time, which makes us cautiously put forward a date towards the end of the 19th century - - photo side: sorry for the reflection of light on the glass, and a detailed view of the back -
