laurel leaves on a bluish-grey background circled on both sides in matte gold. Under the base we note the presence of the golden stamp of the manufacture, the letters JP framing a tower underlined by the word France. The neck takes up the same design as the base, with a wide bluish-grey band decorated with a large frieze of flowers and leaves circled this time in shiny gold. The alternation of shiny gold and matte gold, the discreet presence of colors are the mark of the extreme care taken in the decoration of this piece and the finesse of execution. Its great originality lies in its color. While the vast majority of the production of the Jaget-Pinon manufacture is a blue called "Tours", "Sèvres" or "oven," we discover here a rare "petroleum blue" softer and which contrasts much less with the gilding. Elegance and softness are the terms that best characterize this large vase which will bring an additional refinement to your interior.
