### Description

I offer you this large rectangular mirror in carved and gilded wood with foliage decoration, its shape and symmetry allow it to be presented in the direction of the height and in the direction of the width. The frame was probably a picture frame originally transformed into a mirror. The glass is beveled. The whole is well preserved, I note some small jumps in gilding and missing parts in places (without gravity) External format of the frame: 1.50m x 97cm Format of the view: 1.18m x 64.5cm depth: 10cm Contact me for transport in France and worldwide
