Round Embroidered Tablecloth From The 1700s

800 EUR

Period : 18th century

Condition : Bon état

Material : Silk

Diameter : cm. 140

Description

Round embroidered tablecloth from the 1700s made by splicing together strips of textured fabric, giving continuity to the composition of a damask pattern of roses, fancy flowers and leaves embroidered in cotton and silver lamé. The tablecloth has some wear and tear as documented in the photo gallery, compatible with a date of the 18th century. The tablecloth is lined and therefore the back of the fabric is not visible.Translated with DeepL.com (free version)
