### Description

Exceptional 19th century bronze resting on a very beautiful base in red griotte marble with ogee molding highlighted by a twisted frieze in gilded bronze, this bronze with brown patina represents two children playing with a rooster with its crest raised. Cast with a very beautiful patina due to the quality and density of the alloy allowing the best rendering of the large foundries, this despite the lack of signature very frequent at this time. (this bronze is sold with a certificate of expertise). the dimensions which are indicated are overall.)
