Description

Charming Louis XV style work table, made of molded walnut and enhanced by foliage scroll carvings. Its top, with its lively lines, opens with a drop leaf adorned with a beveled mirror. This reveals five storage compartments, perfect for storing your accessories or precious objects. The front of this piece is punctuated by five curved drawers, with neat moldings, each decorated with a finely chiseled brass pull knob. The elegantly curved legs feature carvings at the top that echo the scroll motif. These legs are harmoniously joined by a spacer shelf, adding stability and style to the whole. This work table is much more than a simple functional element: it embodies cabinetmaking expertise. It will bring a touch of charm and distinction to any interior, classic or contemporary.*****Period: Early
