Description

Gilded Wooden Wall Mirror with Floral Decoration - Napoleon III.

An elegant carved and gilded wooden wall mirror dating back to the late 19th century, crafted in neoclassical style. The rectangular frame is enriched with a refined beading decoration along the inner edge, while the lower and side corners feature fluted and leaf motifs, typical of the period.

The upper cornice is dominated by a rich ornamental vase from which emerge expertly carved flowers and leaves, a symbol of abundance and classical taste. The gilding has a warm antique patina, with pleasant green and red hues that testify to its authenticity and original workmanship.
