The Elements, Allegory Of Earth And Water, Allegory, Modelo In Lead In Bronze

2 600 EUR

Period : 19th century

Condition : Très bon état

Material : Lead

Length : 46 cm

Width : 17 cm

Height : 38 cm

Description

Rare project of bronze fountain of neoclassical inspiration representing the allegory of a river in fact of water and earth, the elements dating from the first half of the 19th century. A model in lead and bronze very finely detailed and chiseled. It would seem that the two characters of ancient inspiration represent a river god accompanied by Ceres the goddess of harvests above a pottery from which flows a source symbolizing a river. A model of fountain, a preliminary project quite rare to find and of very beautiful quality of execution. Look carefully at the details: the superb realization of the faces, the crowns of flowers, the drapes etc ... a neoclassical sculpture in lead of very beautiful craftsmanship. Dimensions: 46 cm long by 17 cm wide and 38 cm high. We deliver and ship all over the world,
