Description

Superb deep plate with a rim from Maison Haviland, Empress Eugenie Collection. The design of this collection was created by the designer Léonce Ribi re for Empress Eugenie. Haviland interprets it in an eponymous dinner service of infinite delicacy. A crown of violets recalls the sovereign's taste for flowers and for the shades of blue, mauve and purple present in her toilets. The composition of the design embodies the Second Empire style, while the swirling violet stems prefigure Art Nouveau. 6 Plates available ?23.5 cm Near mint condition, some micro scratches Marks on the back of the plates
