Trained at the Academy of Fine Arts in Munich between 1956 and 1960, he moved to Paris in 1960, joining the Figuration Narrative group before evolving towards a universe mixing abstraction, biomorphic forms and playful graphics. His work explores the contrast between order and chaos, mixing signs, colors and organic compositions. This lithograph from 1974, signed and numbered, testifies to his creation at a pivotal period when he experimented with forms and graphic supports.
