

Omega Equinox Wristwatch

1 380 EUR

Signature : Oméga horlogerie

Period : 20th century

Condition : Bon état

Width : 27mm

Height : 30mm

Description

Omega Equinox, reversible quartz steel wristwatch. Rectangular case in reversible steel, gold bezel, screwed back. On one side, a champagne-colored analog dial, black glass with Omega logo, luminescent syringe hands. On the other side, multifunction digital dial: hours, minutes, seconds, countdown, chronograph and alarm! Analog and digital quartz movement, caliber 1665 (circa 1981). Integrated bracelet with original Omega-branded folding clasp. Case dimensions: 30x27mm. When we mention the term Reverso, all enthusiasts recall Jaeger-Lecoultré. However, Omega, with its Equinox, offered the first reversible watch with analog and digital display, a technological feat of the early 1980s. This caliber 1655 is the first to superimpose and not juxtapose the functions!!
