Description

A symbol of Greek harmony, the Apollo of Polykleitos embodies the ideal of classical beauty. Inspired by the famous canon of proportions established by the master sculptor in the 5th century BC, this bust reflects the perfect balance between strength and elegance. With its pure lines and majestic bearing, it pays homage to an artistic tradition that has shaped our vision of aesthetics for more than two millennia. What makes it unique is the introduction of the contrapposto, this revolutionary posture that brings naturalness and dynamism to the model. More than a simple reproduction, this piece is a true invitation to rediscover the spirit of ancient sculpture. Its refined patina imitating marble and its black museum-style base make it a decorative object that is both timeless and prestigious, ideal
