

## Modernist Table Lamp

680 EUR

Period : 20th century

Condition : Très bon état

Material : Metal

Diameter : 30

Height : 34

### Description

Modernist lamp with slightly tilting reflector, late 1950s/early 1960s edition. The visual opposition of the two black discs of the reflector and the lamp base, of very small diameter, has been skillfully accentuated by oblique edges and a concave center. This subtlety is repeated at the level of the reflector in which we find the bevel and whose thickness has been reduced to the maximum. The birth of the oblique arm is bordered by a small steel doucine and it does not start from the center or the edge of its base, as on most models of large distribution of the period. Equipped with two sockets for E14 bulbs (supplied), Very good condition, the wiring has been replaced by us. H 34 CM X Diameter of the reflector 30 CM. Diameter of the base 12 CM. New electrification. See this Modernist table
