Description

Beautiful and large kanaga mask Dogon Mali, with cubist features, it is one of the most important masks among the Dogons. This rare model with its bright colors must also have been used in exhibition dances for tourists, probably in the 1950s/60s, we sometimes see similar ones on documents from the time. It still has its large headdress in multicolored rope braid. Total height with headdress 1.50m, wear, an indigenous regluing on the central shaft. Former Belgian collection Serge Sheer
