

Angel Skin Coral Necklace With Yellow Gold Twisted Clasp

1 790 EUR

Period : 20th century

Condition : Très bon état

Material : Coral

Length : 41,4 cm

Diameter : 9 mm

Description

Peau d'Ange coral bead necklace composed of 41 perfectly spherical pearls of a soft, uniform pink. The pearls are elegantly interrupted by finely crafted 18-karat gold elements consisting of two rings framing a gadrooned gold bead. The clasp, also in gold, is distinguished by its twisted design, adding a touch of sophistication to the ensemble. The goldsmithing techniques used highlight the contrast between the softness of the coral and the brilliance of the gold. The finely crafted gold elements add an interesting visual dimension thanks to their twisted texture, subtly reflecting the light.
