

## Medieval Alloy Pendant

135 EUR

Period : Before 16th century

Condition : Très bon état

Material : Alloy

### Description

Medieval Alloy Disk Pendant. A beautiful medieval amulet. The material is likely an alloy from bronze or copper likely with some silver. The disk is decorated with Spirals and Triskeles. These style can be easily associated with the Celtic and Viking cultures. We cannot however rule out that this object may also be Anglo Saxon possibly from Ireland or Britian. Provenance: Originally from a private Spanish Collection.
