### Description

Vincent Gonzalez (1928-2019) French sculptor and designer renowned for his research into organic form and light. Monumental wall light in carved and curved wood. Structure formed from a ribbon of curved and openwork solid wood, articulated in interlocking curves and dynamic points, evoking the movement and tension of natural forms. Particularly mastered play of solids and voids, typical of Gonzalez's formal vocabulary in the late 1960s - 1970s. Electrification discreetly integrated into the structure (screw bulb). Superb work of sculpture and hand finishing, original patina, very good general condition.
