Description

I am offering three charming little miniature "passport" style frames in metal with scrollwork and relief, dating from the 1950s, and all three are different models. The removable "spring" on the back allows for easy positioning, whether placed on a surface or hung; simply press it laterally, remove it, and adjust the position as desired. This also allows for extremely easy photo changes, as the photos are held in place by a transparent plastic film--no glass here... certainly too thick! All three are in excellent condition and will be shipped without the photos. Dimensions: Total heights between 6.5 cm and 5.8 cm; total widths between 5 cm and 4.3 cm. Photo size (visible area): 3.4 cm x 2.5 cm. Weight of all three: 60 grams. Extremely careful shipping is extra; shipping costs will be determined based on
