Description

This remarkable pair of gilded cast aluminum candlesticks is a creation by Pierre Casenove for Fondica, produced in the 1990s. True sculptures in their own right, these pieces are distinguished by their organic forms and raw texture, evoking both nature and the sculptor's hand. Their hammered and irregular surface, enhanced by a luminous golden patina, subtly captures the light, giving each candlestick an almost architectural presence. Faithful to the Fondica spirit, this creation blends fine craftsmanship and contemporary design in a perfect balance of strength and elegance. These candlesticks embody the singular aesthetic of Pierre Casenove, an emblematic figure of French design in the 1980s and 90s, known for his sculptural forms and expressive materials.
