180 EUR

Period : 19th century

Condition : Parfait état

Material : Solid wood

Length : 29 cm et 43 cm étiré

Depth : 14 cm

Description

With its sliding mechanism, this desk bookend can be adjusted to accommodate different book volumes. It is crafted from carved wood in the "Black Forest" style, a decorative art form originating in Switzerland, particularly the town of Brienz. In the 19th century, Brienz specialized in this type of item, often depicting bears, as seen here, with glass eyes and the rest of the body carved and stained from linden wood.
