Pair Of Photolithographic Plates Depicting The City Of Lyon

200 EUR

Period : 19th century

Condition : Etat d'usage

Material : Porcelain

Length : 23

Height : 20

Description

Pair of small plates depicting the city of Lyon using the photolithographic process. The plates feature the cathedral, the Fourvière hills, and Place Bellecour. Signed DRP patent SGDG. The plate is decorated with a bouquet of flowers and a gold rim. The process appeared around 1850, so these plates can be dated to this period. The back has a hanging system. There is an old chip on the plate marked "Cathedral, Fourvière hills." Careful worldwide shipping. Free shipping within France.
