Description

Beautiful wooden candlestick, France, 19th century. The distinctive feature of this piece is its central section that rotates around the shaft. The workmanship is folk art: the pieces are similar but not identical. Each has its own irregularities and unique characteristics. One is thinner than another, or slightly curved while another is perfectly straight. The assembly is simple, the decoration understated. The condition? Perfect. A short video of the piece is available upon request. Free shipping within mainland France. Contact by email preferred. I am available for further information or additional photos.
