

Educational Viper Skeleton

285 EUR

Period : 20th century

Condition : Très bon état

Material : Other

Length : 52cm

Width : 12cm

Height : 5cm

Description

Under its plexiglass dome, this viper skeleton has been observed by children for over 65 years... Indeed, the label from the educational materials store in Bruges only lists five digits for the telephone number. It therefore predates 1961... If it could stretch, the viper would then measure 70 cm long... The photos clearly show its good condition and the few signs of use;
