500 EUR

Period : 19th century

Condition : Très bon état

Material : Solid wood

Length : 130

Height : 226

Depth : 50

#### Description

Superb regional wardrobe in solid oak, crafted in the Southwest (Landes/Béarn). It displays all the attributes of the regional Louis XV style: snail feet, shaped panels, a carved lower rail, a large rounded cornice (145 cm), and a decoration of fine vertical grooves, typical of the region. High-quality traditional construction: fully pegged joints, thick oak planks inside and out, large period brass hinges, panels mounted flat, a warm and even patina, a sound and stable piece of furniture. Very elegant proportions: H 226 cm - W 130 cm (145 cm including cornice) - D 50 cm. The doors measure 58.5 cm each, giving it a striking presence. An authentic wardrobe from Southwest France, understated, substantial, and refined, representative of the local character and regional craftsmanship of the late 18th century.
