Bossuet Bronze After Albert-ernest Carrier Belleuse

350 EUR

Period : 19th century

Condition : Etat d'usage

Material : Bronze

Height : 32cm

Description

Here is a patinated bronze, which, in the absence of a signature, I attribute to the work of Carrier-Belleuse. It is a sculpture that must have originally stood on a pendulum base, leaning against the movement or other elements. Despite these omissions, this bronze remains a work of high quality due to the precise details of the clothing and the facial expression.
