

Hallmarked Silver Medical Spoon Made Circa 1800

850 EUR

Period : 18th century

Condition : Bon état

Material : Sterling silver

Length : 22.3 cm

Description

A hallmarked silver double-bowl medical spoon.

Note: This instrument was used to measure and administer powders or liquid preparations; the double bowl provided two measures adapted to the practitioner's needs. Made of silver for its durability and hygienic qualities, this piece reflects the meticulous medical practices of the period. Reference: A similar model can be found in Hollander's book, page 235, no. 426.

Dimension: 22.3 cm long. London made at the end of 18th/early 19th century.
