Description

A rare and spectacular centerpiece composed of a large central cut crystal bowl, framed by two decorative crystal horns, resting on a sumptuous, finely chiseled gilt bronze mount. The ensemble features a particularly decorative interlacing design of scrolls and plant motifs, typical of the late 19th-century naturalist style / emerging Art Nouveau. The delicacy of the crystal, the striking decorative power of the mount, and the balanced forms give this piece an exceptional presence, ideal for a prestigious centerpiece or a large floral arrangement.
