

## "night" Pair Of Art Nouveau Wall Sconces

2 500 EUR

Period : 19th century

Condition : Très bon état

Material : Metal

Width : 43 cm

Height : 70 cm

### Description

A superb and spectacular pair of Art Nouveau wall sconces, their symbolism representing "night." On a gilt bronze base suggesting clouds, each revealing a crescent moon and a star, rest two white metal cherubs, each holding branches with blossoms at their tips, ready to receive the light bulbs. Although anonymous, this model, rare in its quality, proportions, and the delicacy of its subject, is undoubtedly the work of a major Parisian workshop in the Faubourg Saint-Antoine. Provenance: an estate sale. Restoration is recommended for one cherub's hand. Very good overall condition. Additional photos available upon request.
