### Description

A Handsome, Colorful Scandinavian Country Throne Armchair. An early 19th-century Scandinavian turned armchair, probably Swedish. Turned from a hard pine sometimes called Baltic redwood, this armchair retains its original paint in red, brown, green and black, and is in remarkably good condition. It is something a bit different - perfect for making a statement. The armchair features a prominent bobbin-shaped top rail with finials and a square panel back with bobbin-shaped framing, as well as colorful turned wooden arm supports, flanked by two upright posts topped with simple finials. The base showcases beautifully turned bobbin legs united by stretchers, reflecting a high standard of craftsmanship. This armchair would complement any home, particularly in a kitchen or dining
