

Coats Rack Door Modular Design Minimaliste Vestiaire 50's

1 500 EUR

Period : 20th century

Condition : Très bon état

Description

This is a piece of post-war design or modular furniture appear to be a mission of functionality. A great name is hiding behind its minimalist simple hooks that are formed without a visible weld steel wire. Infinitely practical to distribute the volume flat against the wall. Like any aesthetic coats door is to hang as possible. I emphasize the peculiarity of this locker room that is designed to be modular and therefore accessible to the whole family. The mirror is slightly stung, what does not impede the view and gives a welcome patina of people bitten antiques. The locker room measuring 123.5 cm high by 80 cm wide and 9 cm in maximum depth. Ice measuring 36 cm X 120 cm.
