

Antique Agate Cameo Ring - 18k Gold

950 EUR

Period : 19th century

Condition : Très bon état

Description

An elegant antique 18-karat yellow gold (750?) ring, fully hallmarked, set with a finely carved rectangular cameo in two-tone agate (warm orange background, milky white relief). The cameo depicts a bearded male profile in the antique style, rendered in a neoclassical style inspired by Greco-Roman art, evoking a mythological or heroic figure from Olympus, reflecting the classical aesthetic very much in vogue in the 19th century. The stone is enhanced by a setting with rounded prongs, characteristic of the refined mounts of this period. The delicately crafted openwork setting features shoulders adorned with gold discs, lending elegance, lightness, and visual balance to the whole.

Characteristics: o Metal: 18-karat yellow gold (750?), hallmarked o Stone: Carved bicolor agate
