Width : 103

Depth : 72

Description

Price on demandDining table by Swedish designer Carl Axel Beijbom for Naturbord. Made entirely of beautiful elm. Described as naturalist, close to the Brutalist style in France, like that of Pierre Chapo. A handcrafted piece, as evidenced by the irregularities of the tabletop, of high quality, whose pure design reflects CA Beijbom's noble intentions. Signed and dated underneath 1973. Before embarking on furniture design, Beijbom was a farmer. This experience fostered his appreciation for wood, particularly elm, which became his preferred material.
