

## Pair Of Gilt Bronze Wall Sconces - Rococo Style - Possible Attribution To Pedro Tendero

1 000 EUR

Period : 20th century

Condition : Très bon état

Material : Bronze

### Description

A pair of 20th-century Rococo-inspired gilt bronze wall sconces. Each sconce features three lights arranged at different levels, with curved arms, rich vegetal ornamentation, and a dynamic, asymmetrical design. Electrified, with visible sockets, they are intended for decorative indoor lighting. The pieces are made of high-quality cast gilt bronze, with well-preserved gilding. They are in very good overall condition, with a natural patina and minor signs of age and use. Based on their design, the quality of execution, and the treatment of the gilt bronze, these sconces could possibly be attributed to Pedro Tendero, in the tradition of 20th-century Spanish decorative lighting. No signature or documentation allows for a formal attribution, so this suggestion is made with caution. Dimensions: Height 63 cm (to
