Statue Boyo Bahutschwe Democratic Republic Of Congo Basikasingo Kasingo Pre-bembe

2 900 EUR

Period : 20th century

Condition : Etat d'usage

Description

Boyo ancestor statue, 47 cm high (52 cm with its base), hardwood and red, with a significant black patina. Boyo statues are extremely rare; they reflect the Luba/Hemba style, characterized by their sculptural beauty and Songye expressionism. The last photo, dating from the 1950s, shows a chief with his collection of ancestor statues, very similar to mine. Here is a beautiful description and a very similar example from a prestigious gallery: https://www.atansgalerie.com/pre-bembe. .Note that I have to use powerful lighting to get good definition in the photos; reflections and glare on the images do not exist under normal conditions.
