### Description

Treatise on the Game of Chess, Paris, 1786.  
Second revised and corrected edition. This highly technical treatise considers all the possibilities for winning! Although the calfskin binding is a little worn, the text is in very good condition. A peculiarity can be seen on the title page: a cut that removes the printer's name. A handwritten note, added in pencil, recalls "at Staupe's, printer." The address remains, at the Café de la Régence, Place du Palais Royal, with its nostalgic charm! A label from the binder in Metz indicates that the leather was not of the highest quality, while the printer produced a high-quality work on magnificent paper with a table of masters at the end. 440 pages
