craftsmanship. The pediment is adorned with a basket, birds, and oak leaves. The lower rail features the same carved, openwork foliage, embellished with a lyre. The central panel is finely carved with a decoration of flowers, foliage, and ribbon bows. The door hardware (strap hinges) is particularly long, extending the full height of the doors. The medallion doors are carved with shell-shaped foliage motifs. The keyhole escutcheons with their chiseled designs complete the rich ornamentation of the doors. The original lock functions perfectly. The interior comprises three shelves, one with two large drawers and a small secret drawer. The finish is a waxed filler on light walnut. This cabinet has been fully restored in our workshop, respecting the wood and 18th-century traditions.
