

Cut Or Slice Of Petrified Wood On Its Support

250 EUR

Period : Before 16th century

Condition : Bon état

Description

Magnificent petrified wood cross-section on a base. Estimated period: Neogene - Miocene (20.44-23.03 million years ago). Petrified wood is a mineralized piece of a fallen tree covered with a layer of soil or sand, often due to a natural disaster. The different colors of petrified wood depend on the minerals in the soil. A very beautiful decorative object, this piece does not have a base. It is in very good condition with some minor wear. Dimensions: width 36 cm, height (including base) 30 cm. Careful, secure, and tracked shipping. For shipments outside Europe, please contact me. Thank you. Ref 4058 pers
