Description

Valencian pearl earrings in 18 karats gold. These four-tiered earrings, of Spanish origin (Valencia), consist of a sleeper earring, a rosette, and two caps. The entire piece is made of finely chased gold plates with arabesque motifs. Each tier is adorned with small natural pearls mounted on gold wire. The pendants terminate in tassel pearls. The reverse side reveals traditional gold wire assembly techniques, attesting to their creation without industrial processes. The pearls exhibit slight variations in size and color. These earrings are very light and antique; they should be handled with care.
