

Enregistreur, Récepteur Télégraphe Morse, G. Hasler

1 450 EUR

Signature : G. Hasler Bern

Period : 19th century

Condition : Très bon état

Description

Telegraph Morse recorder used in telegraph offices from 1860 until the mid-1950s. The recorder received the Morse signal from the transmitter station. The current passing through the coils of the recorder generated a phenomenon of electromagnetic attraction and was connected to an ink pen. The paper strip was sliding at a constant speed guided by a spring mechanism. This system made it possible to print on paper the message received as proof of receipt. This recorder is one of the first models used in the post offices of the Kingdom of Italy. The recorder is made of brass and rests on an oak base. Late 1800s. Built by "G. Hasler Bern". G. Hasler was a major Swiss company based in Bern known for the production of telegraph and telephone equipment. In working condition. The Morse
