Description

Very rare cutaway model of a 1960s VVR driving school training car, German-made. These cutaway models were often displayed in driving school windows to teach students how a car and its engine worked. 6-volt electrical system. Everything is functional. The engine runs and drives the rear wheels. The steering, parking lights, low beams, high beams, turn signals, brake lights, horn, brakes, clutch, and gearbox all function. Key included. Dimensions: 95 cm x 36 cm, height: 43 cm. Visit our website: setruk.com
