Description

"Japanese Bronze Crab, Edo Period, Signed, Forming an Incense Burner. Rare Japanese bronze crab forming an incense or perfume burner, probably from the Edo period, signed inside in red. It is large and the details are finely executed; look closely at the photos and the care taken with the hairs on the legs, the eyes, and the claws. An interesting and quite rare object of very high quality. Superb antique patina. One leg appears to have been restored long ago. A beautiful and rather unusual antique Japanese bronze crab. Dimensions: 29 cm long x 15 cm wide x 8 cm high. We deliver and ship worldwide; please contact us for a precise quote.
