

## Educational Natural Latex Flower Cup

325 EUR

Period : 20th century

Condition : Etat d'usage

Material : Other

### Description

Long ago, science classrooms were overflowing with all sorts of teaching materials, displayed on shelves or hanging on the walls. An intriguing botanical specimen sat in the display case, and students received a stenciled glossary with the terms to be studied. This flower specimen, intended for the study of botanical reproduction, measures over 50 cm; both sides are usable. There are a few natural signs of use here and there.
