

Bella Doll Head Mold In Bronze With Number 40 - Curiosity Item - Circa 1970

125 EUR

Period : 20th century

Condition : Etat d'usage

Material : Bronze

Width : 6

Height : 9

Description

Rare, authentic industrial mold from the French manufacturer Bella in Perpignan (1946-1984). This bronze mold was used for rotomolding doll heads in the 1960s and 70s. The object presents a fascinating contrast between the raw exterior and the interior, revealing the delicate facial features in negative. A historical and sculptural piece for original decoration or a cabinet of curiosities. An example made with silicone; the heads of period dolls were, of course, much more beautiful. 3 molds available
